US-001 – View authenticated user profile

Description:

As an authenticated user, I want to retrieve my own profile details so that I can view my account information along with my organization and designation.

1. Acceptance Criteria:

- API returns 200 OK with user profile details for authenticated user.
- Username is resolved from authentication context.
- Returns designation and organization if available.
- Returns 404 NOT FOUND if user does not exist.
- Endpoint is secured and requires authentication.
